

Considering Nursing Home Care:

Facing the realities of chronic illness and/or limitations in the activities of daily living can be a difficult and overwhelming process. A decision like this is one the family should make together with the help of others such as doctors, therapists, and religious/spiritual leaders. Please note that it is essential for your loved one to be as much a part of the decision making process as possible.

Signs that your loved one needs help:

- After an injury, stroke or surgery and needing rehabilitation therapy
- Skilled services are medically necessary
- Not eating well, missing meals
- Forgetting to take medications, mistaking medications or dosage
- Not making sound decisions
- Suffering from a complex, progressive or cognitive health condition
- Bed bound

Sharing Love & Kindness:

In the words of St. Mother Theresa, "...together we can do something beautiful for God."

Sharing our gifts is a beautiful expression of our love for Christ and our solidarity with those most vulnerable. Please know that your generosity provides essential resources to our ministry!
